

Enterprise Risk Management (ERM): 4 Months Certification Programme

IIRM is a premier institute for higher education – a joint enterprise of the Insurance Regulatory and Development Authority of India (IRDAI) and the Government of Telangana. It is committed to developing a future-ready core talent pool of risk managers to steer the insurance sector in harnessing its full potential, in particular, and to guide other business domains, in general.

In the evolving risk environment, developing core enterprise risk managers is critical to enabling enterprises to scale and achieve the aspirations of Viksit Bharat – 2047. This will require more efficient armoury of enterprise risk management (ERM), technology leverage, and improved know-how. To this end, a 4 month 'Certificate course in Enterprise Risk Management' has been curated, keeping the objective of providing risk management skills at its core and keeping the complex ecosystem relatively navigable.

Learning Objectives:

The learning objectives are built broadly to professionally equip you to:

- Define and contextualize risk, aligning with the environmental and political risks.
- Distinguish ERM from traditional risk management
- Be familiar with the nuances of the COSO/ ISO 31000 framework, mergers, and acquisitions.
- Understand the concepts and relevance of a Risk Appetite Statement
